PIGMENT PASTE FOR BALLOON

ROSELENE PIGMENT EMULSION

A practical technical reference for shade selection,
fastness performance, formulations and application.

ROSELENE PIGMENT EMULSION

PRODUCT OVERVIEW

PIGMENT PASTE FOR BALLOON | APPLICATION & PROCESS REFERENCE

Colour development for latex balloon production

Roselene pigment emulsions may be evaluated as colourants in compatible aqueous latex balloon formulations. Grade selection and dosage must be confirmed through production trials.

PRODUCT PLATFORM

Pigment dispersion intended for assessment in water-based latex colour systems, with attention to uniform distribution and batch-to-batch shade matching.

TECHNICAL APPROACH

Assess dispersion in the latex compound, colour strength, sedimentation, foam behaviour and compatibility with other compounding ingredients.

APPLICATION

Evaluate addition into the balloon latex mixing stage. Check colour uniformity on dipped films and appearance after vulcanisation.

PROCESS REFERENCE

Prepare a laboratory trial → mix into latex under controlled agitation → dip → dry and vulcanise using the manufacturer's validated conditions.
