PIGMENT PASTE FOR GULAL

ROSELENE PIGMENT EMULSION

A practical technical reference for shade selection,
fastness performance, formulations and application.

ROSELENE PIGMENT EMULSION

PRODUCT OVERVIEW

PIGMENT PASTE FOR GULAL | APPLICATION & PROCESS REFERENCE

Colour development for festival powder systems

Roselene pigment emulsion shades may be screened as colour inputs for suitable powder-colouring processes, subject to dry-down behaviour and end-use safety approval.

PRODUCT PLATFORM

Concentrated aqueous pigment dispersion for formulation evaluation; suitability for dry gulal depends on the powder base and drying process.

TECHNICAL APPROACH

Evaluate colour strength, even coating of powder particles, drying behaviour, free-flowing properties and dust generation after drying.

APPLICATION

Trial incorporation onto a compatible powder carrier by controlled mixing or spraying, followed by drying and particle-size review.

PROCESS REFERENCE

Select carrier → screen pigment grade and low trial dosage → mix uniformly → dry fully → sieve and test finished powder.

SAFETY

End-use approval

PINK ROSE PIGMENTS PVT. LTD.

NOT a declaration of skin safety. For skin-contact festival gulal, independent toxicology, inhalation exposure and applicable compliance testing are essential.
